"With regard to the morality of a book, it is no doubt true, that any subject may be chosen for its art value alone and so will not, or rather need not, be any scandal in the writer or reader. The question, however, is the practical effect, and is of course one of degree, where no line can be drawn . . . What is innocent in a writer, if it cause scandal to certain readers is wrong on that ground. This is a question of degree for perhaps we are not bound to consider those who will take scandal from everything. It is required that the number only should be small. Then with the work itself the question is how far in point of detail one may safely go — another question of degree. One thinks, e.g., that "Othello" should be called innocent, Ovid immoral."
